

# Power BI in a Day

## Corporate Training – 1 day

This interactive workshop is designed to introduce new users to Power BI to start creating and sharing Data Visualizations. The attendees will be exposed to the typical Power BI Lifecycle for Data Visualization, through a series of lectures and hands-on labs.

Who is this training for?

Users that are new or minimal experience in Power BI.

Business Users, Excel Users, IT professionals and Analysts.

Led by a **Microsoft Power BI Certified Instructor**, in 1 day, Attendees will learn:

1. The Potential of Power BI as a Data Analytics and BI platform inside the Organization
2. How to Connect and Transform Data from different Data Sources
3. Define metrics and KPIs
4. Analyze data creating Power BI Report with stunning visualizations
5. Share the Power BI Reports with the Team in the Power BI Service

At the end of the Workshop, attendees will have a basic understanding of Power BI and its Potential for Data Analytics and have created their first Power BI Report.

Training Modality Options: Virtual or On-site in South Florida Area - United States.  
Language options: English or Spanish.
